Contact Distribution and Renkus-Heinz invite you to a showcase of truly unique engineered solutions for loudspeakers.

Based on over thirty years of innovative concepts and patented technologies Renkus-Heinz offers eight series' of speakers to address the most challenging acoustical spaces. Due to significant investments in engineering staff and resources Renkus-Heinz has released a flood of new product recently and we've assembled an assortment of them for your evaluation. The focus for this presentation will be the western Canada unveiling of VARIA, who's fully modular design enables cabinets to be easily configured as flown vertical arrays, powerful horizontal arrays, or ground stacked systems. A range of vertical and horizontal dispersion angles and Renkus-Heinz's unique transitional waveguides make it easy to custom design a system for every application. Also on display will be IC², the latest advancement in the IC Live product group along with the IC Live system and the recently upgraded ICONYX IC-R-II versions both with newly added features and capabilities. The recent development of steerable loudspeaker systems has changed the industry and R-H is indisputably the leading manufacturer with more products, features and capabilities.

We are additionally pleased to announce that Rik Kirby VP of Sales and Jim Mobley Senior Application Engineer, who many of you know, will be flying in to assist Lucas Truman in the presentation.

There is no question there are a lot of speaker manufacturers in the marketplace to consider but there are only a few with the experience, consistency and innovativeness to be amongst the top brands where Renkus-Heinz product ranks. If you are an audio professional this presentation is not to be missed as it represents the leading edge of development and performance in the professional loudspeaker market.

On Tuesday and Thursday we'll be running sessions at 10am, 12pm, 2pm and 4pm and would appreciate a quick note back if you know which session you'll be attending.

We encourage you to come and hear what we believe probably surpasses what you are currently using.
